WALLEYE KILLER ■

This lure is especially designed for the walleye fisherman, however, it is as deadly for northern pike. It is most effective when trolled slow and deep with a minnow, leech or night crawler. By sliding the spring above the hook upward, the hook may be changed to a different size.

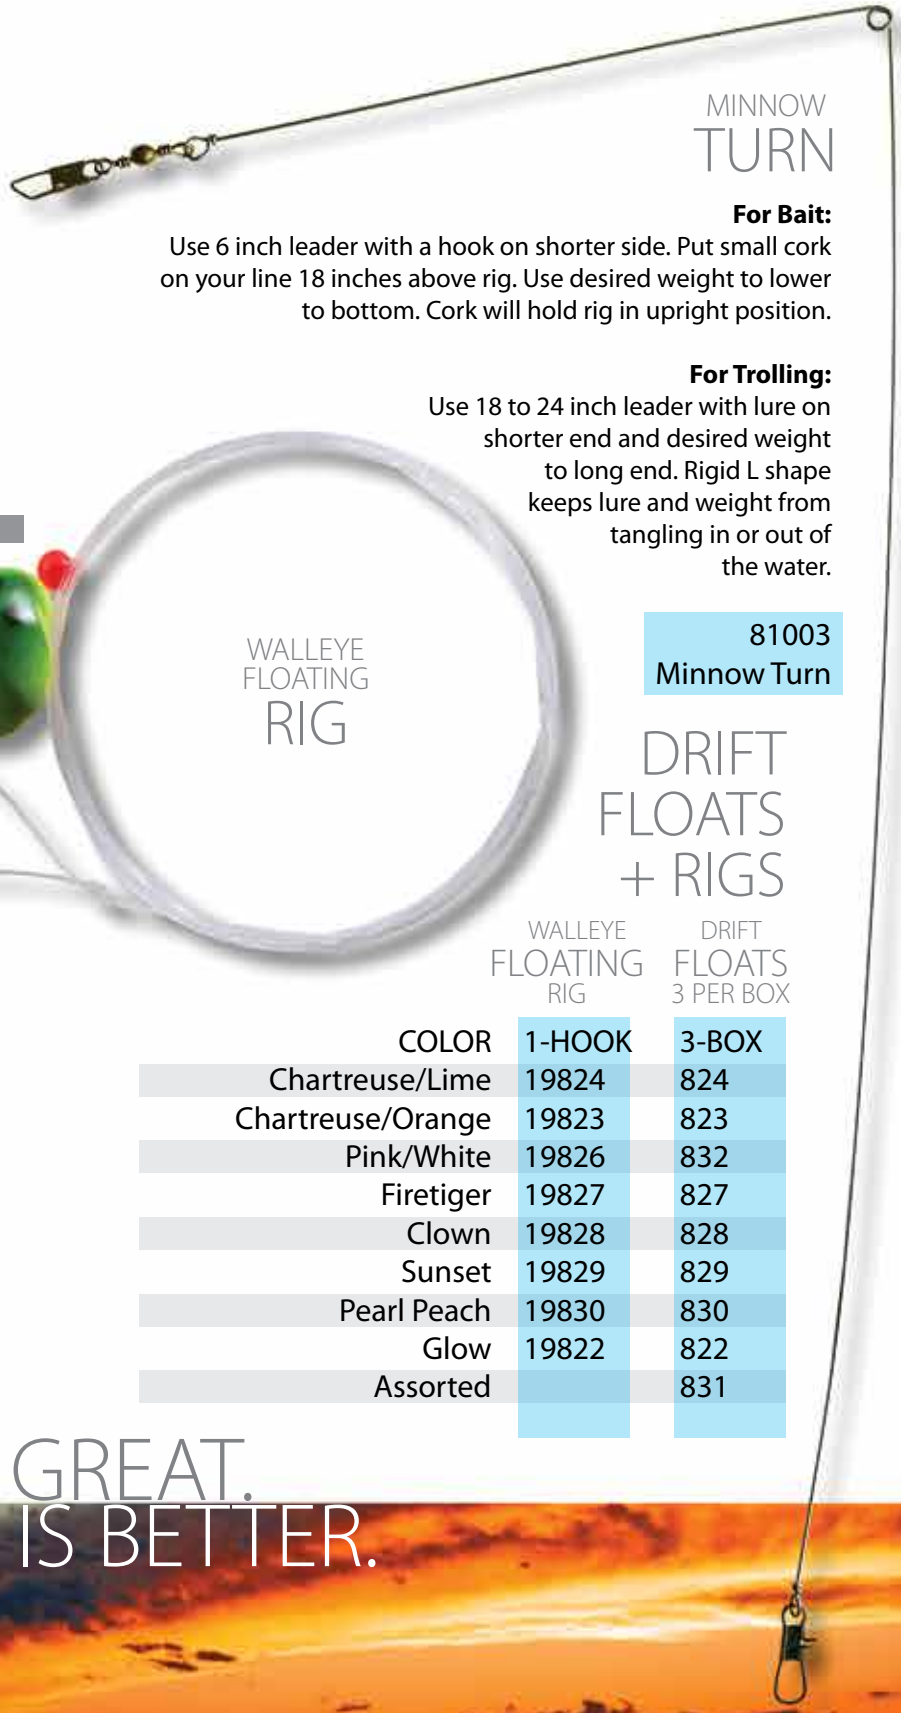
WALLEYE FLOATING RIG



MINNOW TURN

For Bait:
Use 6 inch leader with a hook on shorter side. Put small cork on your line 18 inches above rig. Use desired weight to lower to bottom. Cork will hold rig in upright position.

For Trolling:
Use 18 to 24 inch leader with lure on shorter end and desired weight to long end. Rigid L shape keeps lure and weight from tangling in or out of the water.

FISHING IS GREAT.
CATCHING IS BETTER.

BOTTOM RIGS

BEADED BULLHEAD RIGS

The long and short leaders are free and independent of each other. The beads and extra swivel gives it a better tangle free Rig. It is best to put the hook on the short leader and the sinker on the long leader when fishing for Catfish or Bullheads. When trolling, reverse the hook and sinker. This item is made of 30 lb test steelon material. 1 per bag or 24 per ring

10469 Beaded Bullhead Rig 1 per bag
10131 Beaded Bullhead Rig Bulk

BOTTOM BOBBER

This is indeed a unique rig, never been anything like it before. It is used for game and pan fish, for bullheads and catfish. Put sinker on long arm and bait on short arm of bottom bobber rig. Cast from shore, out of boat or off a dock. Sinker takes bottom bobber rig to the bottom, built in float holds rig upright. Fish with a slightly slack line. On retrieving, float causes rig to rise as line is tightened, thus bait comes in free from snags.
